PRODUCT SALES SHEET

Z-Ends with micro-tubing

Z-Ends with micro-tubing (PT-18) are used with the Zap adhesives to assist in easier application. The package comes with Z-Ends (10) and Teflon micro-tubing (12 inches).

Z-Ends (or Extend tips) can be used with any viscosity of the Zap cyanoacrylate adhesives and do fit the breakaway luer tips on the bottles. The Z-End tips allow the user to apply smaller drops of adhesive more precisely or to aid in reaching into confined spaces.

Teflon micro-tubing is specifically suited for the Zap-CA (PT-06 through PT-10) and Plasti-Zap (PT-19). The tubing can be fed into the breakaway luer tip on the bottle and cut to the desired length for small drop application. It is best used for only thin viscosity adhesives.
